BIOMETRIC INFORMATION

The school uses a cashless system for students to pay for food in the dining area. Students access their money with a biometric system (the system generates a unique code from the pattern on one of their fingers). We intend to extend this system to release work from the computer printers and photocopiers and release of library books.

Do both you **and** your son/daughter give your consent for us to electronically store the code generated from the finger pattern and use this for catering payment, print release and library books?
