

# Year 10 – Interview Ready Day

Year 10 took part in an interview ready day with EBP. They spoke to employers from engineering (Colas) and civil engineering (Volkerfitzpatrick).

They learnt:

- The key employability skills needed for all careers
- The range of different interviews that companies may use
- The difference between a good and bad interview
- Completed an activity that would test their problem solving, teamwork and communication skills - linked to what could happen in an assessment centre during the group interview process
- Top tips ready for their mock interview day in March

Lots of good advice to take into the mock interview day.
