

Year 8 – Enterprise Day

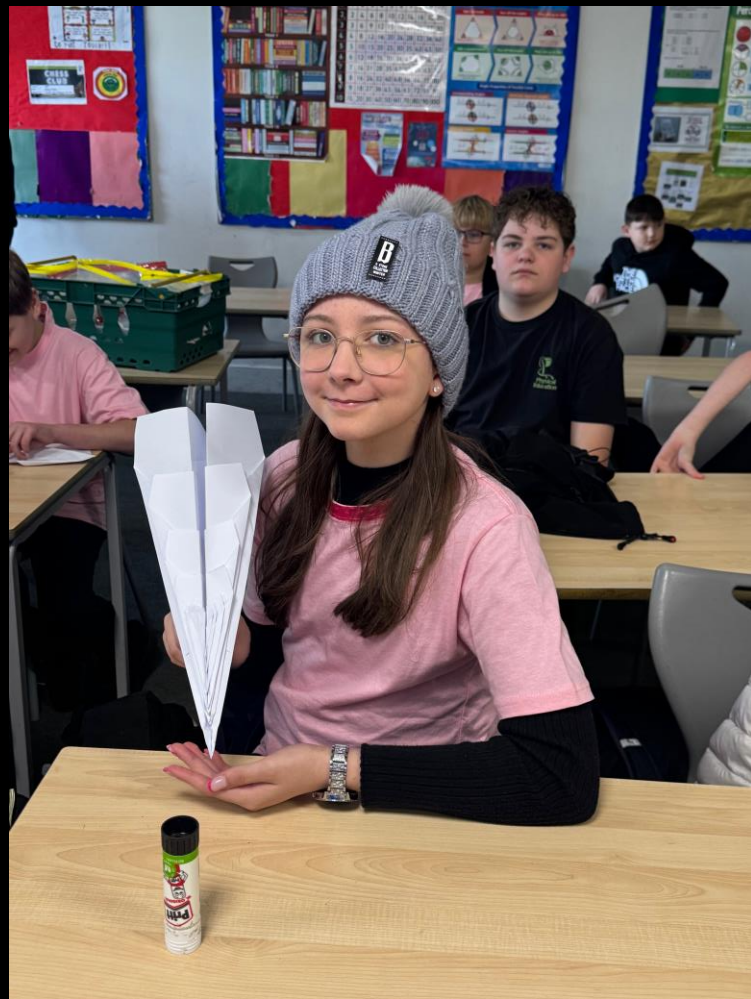

For PD day this term, year 8 took part in an Enterprise Day, designed to develop creativity, teamwork and problem-solving skills. Students began the day with a team building challenge, designing, refining and testing paper planes before evaluating how they could be improved. They then applied these skills by creating a wellbeing product and presenting their ideas to the class. Students across all groups worked hard throughout the day and showed strong engagement, collaboration, and pride in their work they produced.
