

If you didn't already know, Mr Shearn is a keen golfer. Sometimes he loses his shirt with all the excitement!!

Mr Shearn and Mr Bedford went to play 18 holes (not during lockdown!!). Mr Bedford is a far better golfer so gives Mr Shearn a 3! shot advantage before they start.

The course has a par score of 70. Mr Bedford completes the course in a score of 140% of 70...a personal best!

Mr Shearn, not including the 3! shot advantage Mr Bedford gave him at the start, completes the course in a score of 1.5 of 70.

Including the 3! shot advantage Mr Bedford gave Mr Shearn, who won and by how much? (Golf = the lower score wins)

First correct solution or
nearest to the pin!!
Wins...chocolate
